KRETO

kreto is a one way for you to take an adventure of Indonesia

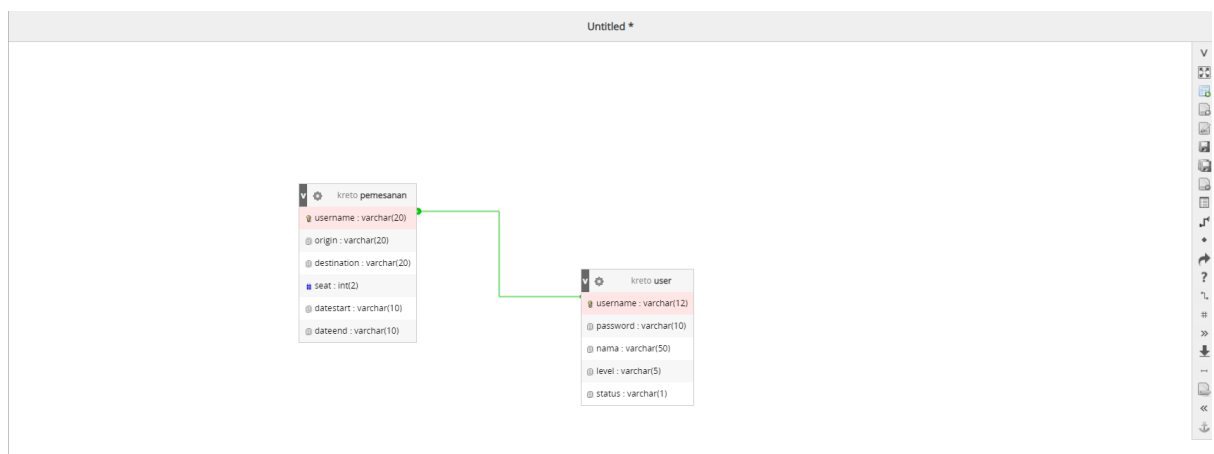

Background

- ➔ I choose the train ticket order with multiuser login between admin and user. The restriction that I used with `$_SESSION` and also redirect. Also, with the help of `.htaccess` in every document. For example, if we want to change from admin to user it will have a prompt and also error with redirect into the admin account.

If you type any keyword that doesn't belong there, it will prompt an error page
